Quarterly Opioid Situation Report

Grey Bruce, July-Sept 2026

The Opioid Situation Report for July to September 2026 outlines details of the reports of suspected opioid related overdoses received through the Grey Bruce Early Warning System. For this system, reports of suspected opioid-related events are sent to Public Health primarily from EMS, plus Police, Fire, and our 211 *Report a Bad Drug* Online Form/Call-in process. If warranted, an alert designed to advise the community of potential increased risk related to opioids in the area is issued to community partners and the general public to ensure a rapid, coordinated, multisector response to local opioid-related events.

Timeframe	# of Opioid-related Overdoses	# of Opioid-related Fatalities	# of Alerts	# of Media Releases
July-Sept 2025	22	2	1	0
July-Sept 2026	61	2	7	0

Naloxone was used in 36 of the reported overdoses and was **successful in reversing the overdose in 35 cases.**

Reported Drugs

Information on suspected substances provided in 39/61 reports

Distributed 1606 Naloxone Kits

Trained 457 people to use Naloxone
